Girls' Primary Schools Lack of Non-Teaching Staff

A Report based on Monitoring of 137 Government Girls' Primary Schools in December 2010

Government Girls Primary Schools, monitored by FAFEN in December 2010, lack non-teaching staff and some basic necessities like clean drinking water for students. Sanitary workers were not present in 72% of the monitored schools, 32% did not have a peon and 29% lacked a security guard. The availability of the aforementioned non-teaching staff is not only essential for a clean and secure learning environment for children but also important to provide adequate support to teaching staff and the school management.

Despite the fact that children are more prone to water borne diseases, basic facility of clean drinking water was not available to half (49%) of the 137 monitored schools nationwide. In addition, 46% of the monitored schools did not have the facility of staff rooms for teachers and 24% were without playgrounds.

FAFEN Governance Monitors observed that one fifth of the 137 monitored schools nationwide, were not housed in proper buildings. In KP, the situation was better compared to other regions as 91% of the monitored schools were housed in proper buildings while 24% of those monitored in Punjab, 25% in Balochistan and 26% in Sindh were not.

Transparency surfaced as a major issue during December, 2010 as 20 schools did not provide information about the sanctioned teaching posts and 66 declined to provide information about the sanctioned posts of non-teaching staff.

Graph A: Government Girls Primary Schools Monitored by Region

KP, 24%

Sindh, 26%

FATA, 1%

Punjab, 43%

Among the schools that provided information about the number of sanctioned and posted teaching staff, it was observed that on average, 7% of the sanctioned teaching posts were lying vacant. The highest number of posts were lying vacant in Sindh, where 9% of the sanctioned posts in 23 schools (that shared information) were not filled. The 71 schools that provided information regarding the number of sanctioned and posted non-teaching staff showed that 13% of the posts were not filled. In this category as well, the highest number of non-teaching posts were vacant in Sindh (22%), where 29 posts were filled against 37 sanctioned posts.

Nation-wide, the average number of students

per teacher came out to be 34. Highest number of teacher student ratio was observed in FATA, where one teacher was appointed to teach on average, 45 students. Lowest teacher student ratio was observed in Sindh, where one teacher was responsible to teach 27 students.

Balochistan

6%

FAFEN Governance Monitors visited 137 government girls' primary schools in 87 districts of four provinces and FATA. Fifty nine schools were monitored in 32 districts of Punjab, 33 in 23 districts of KP, 8 in as many districts of Balochistan, 35 schools in 22 districts of Sindh and two schools in as many agencies of FATA.

Province	Girls Primary Schools Observed	Percentage	Districts			
Punjab	59	43%	32			
KP	33	24%	23			
Balochistan	8	6%	8			
Sindh	35	26%	22			
FATA	2	1%	2			
Total	137	100.00%	87			

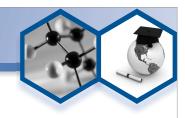

Table A: Number of Districts Observed

1. Teaching Posts

Of the 137 monitored Government Girls Primary Schools, 117 provided information regarding the sanctioned teaching posts and the number of teachers posted in the school. Among those that provided information about the posted and the sanctioned teaching posts, it was observed that on average 7% of the teaching posts were lying vacant in Girls Primary Schools across the country.

In Punjab, 262 posts were filled against 280 sanctioned teaching posts in 56 schools that provided information. The vacant teaching posts (18) made about 6% of the total sanctioned posts in Punjab. In KP, 7% of the posts were vacant out of 197 sanctioned posts in 30 schools. The region where the highest numbers of posts were lying vacant (21) was Sindh, where 9% of the sanctioned posts in 23 schools were not filled. Teachers were posted against all the sanctioned teaching posts in the monitored schools of FATA and Balochistan.

	Table 1: Teaching Posts in Government Girls Primary Schools by Region								
Sr. No.	Province	No. of Sanctioned Posts for Teaching Staff	No. of Teachers Appointed against the Sanctioned Posts	Vacant Teaching Posts (%)	No. of Schools Providing Information				
1.	Punjab	280	262	6.43	56				
2.	KP	197	183	7.11	30				
3.	Balochistan	43	43	0.00	6				
4.	Sindh	227	206	9.25	23				
5.	FATA	5	5	0.00	2				
Total		752	699	7.05	117				

2. Non-Teaching Posts

Only 71 schools provided information about the number of non-teaching staff (posted or sanctioned). Based on the data of these 71 schools, 13% of the sanctioned posts were lying vacant. The highest numbers of sanctioned posts of non-teaching staff were lying vacant in Sindh where 22% posts were unoccupied in the 17 schools that provided information in this regard.

In Punjab and KP each, 9% of the sanctioned posts of non-teaching staff were lying vacant in the schools that provided information. In FATA on the other hand, all the three sanctioned posts in the two monitored schools were occupied. None of the eight schools monitored in Balochistan provided information in this regard.

Sr. No.	Province	No. of Sanctioned Posts for Non-Teaching Staff	No. of Non-Teaching Staff Appointed against the Sanctioned Posts	Vacant Non- Teaching Post (%)	No. of Schools Providing Information

5.	FATA	3	3	0.00	2
Total	•	118	103	12.71	71

Table 2: Non-Teaching Posts in Government Girls Primary Schools by Region

3. Teacher-Student Ratio

Information regarding the number of enrolled students and number of posted teachers was received from 117 schools across the country. A total of 699 teachers were posted in these schools to teach 24,060 enrolled students. On average, one teacher was responsible for 34 students. In Punjab, 262 teachers were posted in 56 schools, where one teacher was responsible for 35 students.

A total of 183 teachers were posted in 30 schools of KP to teach 7,160 students. The teacher student ratio in KP came out to be 39. In Balochistan the teacher student ratio was slightly higher than KP as one teacher was assigned to 42 students.

The highest number of students per teacher was observed in FATA, where one teacher was appointed to teach on average 45 students. The lowest number of students per teacher was observed in Sindh, where one teacher was responsible to teach 27 students. A total of 206 teachers were posted in 23 schools of Sindh to teach 5,574 students.

Lower teacher student ratios, like those seen in schools monitored in Sindh are optimal for this ensures that adequate attention is paid to each student, whereas in larger classes, it is difficult for the teacher to give individual attention to students.

	Table 3: Teacher-Student Ratio by Region						
Sr. No.	Province	Teachers Posted in the School	Students Enrolled in the School	No. of Students Per Teacher	No. of Schools Providing Information

Total		699	24060	34	117		

Table 3: Teacher-Student Ratio by Region

4. Teacher Attendance

Of the 114 schools that shared information regarding the teacher attendance at girls' primary schools, about 75% of the schools had the attendance of teachers ranging between 76% and 100%. These schools included two monitored schools of FATA, six of Balochistan, 20 schools of Sindh, 26 of KP and 33 schools of Punjab.

A total of 17 schools, which includes 11 schools of Punjab, five of KP and one school of Sindh, informed that the teachers' attendance ranged between 51% and 75%. Attendance of teachers was between 26% and 50% in nine schools of Punjab and two schools of Sindh.

Six schools in Punjab, three in KP, two in Balochistan and twelve schools in Sindh, withheld information regarding the attendance of teachers at the girls' primary schools during December 2010.

	Table 4: Teacher Attendance at Government Girls Primary Schools by Region

Total		53	30	6	23	2	114	

Table 4: Teacher Attendance at Government Girls Primary Schools by Region

5. Student Attendance

One hundred and thirty four schools shared information regarding the attendance of students in the girls' primary schools. One school each in KP, Balochistan and Sindh did not share information with the FAFEN observers regarding the students' attendance in the school on the day of visit.

In about 60% of the monitored schools the attendance of students was between 76% and 100%. Thirty-seven schools of Punjab, 26 of KP, five of Balochistan, 12 of Sindh and one school of FATA had this high percentage of student attendance in schools in the month of December, 2010. A total of 42 schools, which include 17 schools of Punjab, six of KP, two of Balochistan, 16 of Sindh and one school of FATA, had the attendance of students' between 51% and 75%.

The students of four schools of Punjab and five schools of Sindh registered the percentage of attendance between 26% and 50%. Student attendance at one school each of Punjab and Sindh was below 25%. Even though the security conditions in Punjab and Sindh are a relatively better than in KP, Balochistan and FATA, the attendance of students in schools of Punjab and Sindh was lower. Increased inflation and poverty can be another reason for the absence of students from schools.

Sr. No.	Percentage of Students Present	Punjab	KP	Balochistan	Sindh	FATA	Total
1.	Below 25%	1	0	0	1	0	2
2.	26% to 50%	4	0	0	5	0	9
3.	51% to 75%	17	6	2	16	1	42
4.	76% to 100%	37	26	5	12	1	81
5.	Above 100%	0	0	0	0	0	0
Total		59	32	7	34	2	134

Table 5: Student Attendance at Government Girls Primary Schools by Region

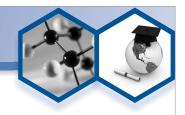

6. Building and Facilities

One fifth of the 137 monitored schools were not housed in proper buildings. In KP, the situation was better compared to other regions as 91% of the monitored schools were housed in proper buildings while 24% of those in Punjab, 25% in Balochistan and 26% in Sindh were not. Boundary walls were present around 95% of the monitored facilities. Those not surrounded by boundary walls included 5% of Punjab, 3% of KP and 9% of Sindh's monitored schools. The two monitored schools of FATA were housed in appropriate buildings with boundary walls.

Electricity connection was available to 88% of the schools monitored in December, 2010. About 86% of the schools in Punjab, 75% in Balochistan, 86% in Sindh and all the schools of KP had electricity connections. This facility was also provided in one of the two monitored schools of FATA. In 23% of the 137 monitored schools fans were missing. Fans were not present in 38% of Balochistan's schools, 25% of those in Punjab, 24% in KP and 17% in Sindh. Both the schools monitored in FATA agency had fans in all classrooms.

Eighty seven percent of the monitored schools had well lit classrooms. Illuminated classrooms are essential for a better learning environment. Both the schools monitored in FATA, 88% each in Punjab, KP and Balochistan, and 83% of the monitored schools in Sindh had well-lit classrooms.

The arrangement in the monitored schools regarding clean drinking water was inadequate. About 49% of the schools lacked this facility. In a children's school the availability of clean drinking water is a necessity, as children are more prone to water borne diseases (Diarrhea, Dysentery, Gastroenteritis, etc.) than adults. Three-forth of the schools monitored in Balochistan, 60% of the schools in KP, 47% in Punjab, 31% in Sindh and 50% of the schools monitored in FATA lacked the arrangement of clean drinking water for the students.

Only 25% of the schools monitored in Balochistan had a black/white board available in the class rooms. The situation was better in the rest of the regions as about 57% of the schools in Sindh, 86% in Punjab, 88% in KP and all the schools in FATA had a black/white board available to them.

Seventy-six percent of the monitored schools had playgrounds for the students. Balochistan showed the most lack in this area as about 38% of the schools monitored in Balochistan lacked a playground for students. All the schools monitored in FATA, 76% in Punjab, 79% in KP and 74% of the schools in Sindh had a playground. Staff rooms for teachers were not present in 46% of the monitored schools nationwide. The highest lack was observed in Balochistan, where 75% of the schools did not have staff room for teachers. About 66% of the schools in Punjab, 50% in FATA, 27% in KP and 26% in Sindh also lacked this facility for teachers. Even though many girls schools lack playgrounds and staffrooms, the situation in still relatively better when compared to boys' primary schools (monitored in December), where 70% of the schools did not have playgrounds for students and 88% did not have a staff room for teachers.

The availability of the non-teaching staff was an issue in most of the schools that were monitored. A serving sanitary worker was available in only 28% of the girls' primary schools that were monitored nationwide. None of the schools in FATA had a sanitary worker. About 88% of the schools in Balochistan, 79% in KP, 73% in Punjab and 60% of the schools in Sindh lacked a serving sanitary worker. This shows a negligent attitude towards cleanliness in Girls Primary Schools nationwide. The availability of a peon and a security guard was better as compared to the availability of a sanitary worker. A peon was available in 68% of the monitored schools. Half of the monitored schools in Balochistan, 40% in Sindh, 32% in Punjab and 21% of the schools in KP did not have a peon. All the schools in FATA had a peon as well as a security guard. Security guard was available in 71% of the girls' primary schools. Twenty nine percent of the schools in Punjab, 27% in KP, 38% in Balochistan and 31% of the schools in Sindh lacked the availability of a security guard despite media reports of threats to girls' schools around the country, in particular, and educational facilities in general.

Only 71 schools provided information regarding the sanctioned and appointed posts of the non-teaching staff. Thirteen percent of the sanctioned posts were lying vacant despite the fact that there was a shortage of non-teaching staff in the monitored girls' primary schools.

Table 6: Building and Facilities in Government Girls Primary Schools by Region (Percentage)

7. Government Oversight

In the past three months, 82 visits by government officials and elected representatives were made to the 137 monitored government girls' primary schools. During these months, only one visit was made by an MNA to a school in Punjab and two visits by MPAs were made to one school each in Punjab and Sindh.

Overall, 27 visits were made to Girls Primary Schools by EDO Education to the monitored facilities. Nine of these visits were made in the monitored schools of Punjab, seven visits each in KP and Sindh, three in Balochistan and one in the monitored school of FATA.

Fifty two visits were paid to the monitored girls' primary schools of the country by other elected representatives and government officials in a span of three months. Of these 52 visits, 33 were made to monitored schools of Punjab, 10 to Sindh and nine to KP.

Despite visits by government and elected officials, issues of physical infrastructure, vacant teaching and non-teaching posts and high student teacher ratios exist in the 137 monitored facilities. It is not clear why action was not taken to eradicate these discrepancies even after visits by government and elected officials.

Monitoring Methodology

The Free and Fair Election Network (FAFEN) has launched a nationwide initiative to monitor governance processes under its Democratic Governance Program as part of its mandate to strengthen all forms of democratic accountabilities in Pakistan. Objective information about governance processes is vital to encourage informed engagement of citizenry with elected and public institutions for progressive outputs. FAFEN Governance Monitoring aims at enriching the public discourse and debate on governance and developing research-based recommendations for reforms.

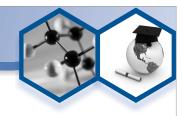

FAFEN advocates for transparency, accountability, responsiveness, representativeness and public participation as essential elements of democratic governance to enhance the output, efficiency and effectiveness of all elected and public institutions.

FAFEN Governance Monitors visit schools and colleges, heath facilities, police stations and other public institutions to monitor and evaluate their efficiency and efficacy in 150 National Assembly constituencies of 108 districts in Punjab, Khyber Pakhtunkhwa, Balochistan, Sindh, Federally Administered Tribal Areas (FATA) and Islamabad Capital Territory (ICT). In addition, FAFEN is also monitoring complaints handling mechanisms of various public institutions to gauge their effectiveness.

Trained FAFEN Governance Monitors fill out standardized checklists during their monitoring visits, employing interviewing and observation techniques, and then transmit the data to the FAFEN Secretariat in Islamabad for data entry, cleaning and analysis. FAFEN plans to produce monthly thematic reports such as this one. This information will also contribute to FAFEN Bi-Annual State of Governance in Pakistan Reports.

FAFEN Governance Monitoring reports are based on non-probability sampling, and their findings should not be considered national or provincial generalizations. However, FAFEN's outreach across the country allows it to access most districts as well as urban and rural areas. Standardized methodology is applied across Pakistan to draw information in a uniform way through observation and interviewing. The observation and interviews are recorded on a standardized checklist. All information received at the FAFEN Secretariat is verified through multiple sources for authenticity and accuracy. These reports provide data analysis and inferences only for the monitored institutions within the sample. These reports are meant to present to relevant stakeholders a consolidated and current snapshot of the state of governance in public institutions in order to inspire public dialogue and as a contribution towards targeted interventions and reforms.

However, FAFEN's unique methodology to assess and evaluate governance processes continues to evolve. Any inaccuracies that may be noticed in the data or suggestions for improvement in the methodology can be sent to the email address at the end of this report.

About **FAFEN**

Free and Fair Election Network (FAFEN), established in 2006, is a coalition of 35 leading civil society organizations, working to strengthen all forms of democratic accountabilities in Pakistan. Governed by Trust for Democratic Education and Accountability, FAFEN's key achievements are:

- Observed the public display of Pakistan's draft electoral rolls and conducted the country's first statistically-valid voters' list audit in 2007
- Deployed more than 18,829 trained, neutral Election Day observers nationwide to watch the February 18, 2008 polls and 264 long-term observers to monitor the pre-election process
- Fielded long-term observers nationwide and published 19 pre-election reports
- For the February 18, 2008, General Elections, FAFEN conducted 260 simultaneous Parallel Vote Tabulations (PVTs)- the largest effort in the world
- Conducted its first survey, Constituents Aspirations Survey, in December 2008 with a sample size of 3,124 respondents to get the description of the state of public opinion and also to get a deeper understanding of the values, attitudes and beliefs of people living in the constituencies
- Conducted mapping of organizations working for human rights within Pakistan
- Observed general elections at Gilgit-Baltistan in 2009 and by-elections in various constituencies of the Punjab, Balochistan and Khyber Pakhtunkhwa in 2010
- Implemented a unique methodology to observe parliamentary proceedings under its Parliamentary Watch Project
- Monitors public institutions across Pakistan and issues monthly reports on the state and performance of educational, health and other local level institutions. In addition, monthly reports on prices, crimes, incidence of disease, caseload in lower courts and political and electoral violence are issued.

FAFEN continues to implement robust programs in-between elections related to monitoring parliamentary affairs, connecting constituents to their elected representatives, monitoring the performance of public and elected institutions and advocating electoral and democratic reforms. FAFEN is also monitoring political and electoral violence, peace activities and promoting active citizenry through ongoing civic education activities across the country. FAFEN is currently implementing Democratic Governance Program in 150 National Assembly constituencies in 108 districts across Pakistan.
