# INTRODUCTION

Periodic modifications to the boundaries of electoral constituencies are essential for adhering to the principle of equality of vote and ensuring equitable political representation within and across federating units. Rapid changes in the population sizes of constituencies over the course of several years can result in significant variation in population sizes across constituencies which has consequences for the number of citizens represented by each seat in an assembly. Redistributing population and ensuring uniformity in numbers, within acceptable bounds of variation, is key to improving the quality of elections and public trust in the process.

The Election Commission of Pakistan (ECP) has released a preliminary report of proposals for fresh delimitation of constituencies for National and Provincial assemblies, which are to be finalized after voters' objections to the proposals have been addressed. Examination of the proposed delimitations shows that the ECP has complied with the legal delimitation principles of geographical compactness and respect for the administrative units' existing boundaries, however, the principle of equality of vote has been compromised in 81 National Assembly (NA) constituencies, where the variation in population size exceeds the permissible legal limit of 10%.

Pakistan's Constitution defines the number of seats for the National and Provincial assemblies and stipulates the demarcation of constituencies on the basis of population in accordance with the last population census **officially published**. Similarly, the Elections Act, 2017 authorizes the ECP to delimit constituencies for the National and Provincial assemblies and local governments and lays out principles of delimitation that have been elaborated in Election Rules, 2017. Since the results of the 6<sup>th</sup> Population and Housing Census 2017 were unlikely to be officially published before April 2018, a Constitutional Amendment was sought in December 2017 to allow the ECP to delimit constituencies on the basis of provisional census data. This one-time arrangement was warranted by the lack of time required for the delimitation process to be completed between the expected date of official publishing of the census results of the and the upcoming General Elections in July 2018. The amendment also provided for an exemption to Federally Administered Tribal Areas (FATA) from the current delimitation's purview.

Since the Constitution makes no provisions for an increase in the number of constituencies for National and Provincial assemblies, the ECP had to redistribute the population among the existing 272 National Assembly constituencies. Even though the last delimitation exercise was conducted 16 years ago, the total number of National Assembly (NA) seats has remained unchanged.

Delimitation principles laid out in the law include the distribution of population in geographically compact areas respecting the physical features, existing boundaries of administrative units, facilities of communication and public convenience and other cognate factors to ensure homogeneity in the creation of constituencies. The law further specifies the permissible limit of variation ( $\pm 10\%$ ) in population sizes between two constituencies. In exceptional situations where this principle is not practicable to follow, the ECP has to record the reasons in writing.

A comparative assessment of the proposed delimitations reveals lopsided inter-regional demarcations in the average population sizes of constituencies. For instance, the average population per constituency in Islamabad Capital Territory (ICT) is 667,193 citizens per one National Assembly seat, while the average population per constituency in Sindh is 785,135 citizens per NA constituency.

This report presents a comprehensive analysis of the distribution of population in NA constituencies. On the basis of data from the provisional census results, the latest publicly released electoral rolls, and the ECP's delimitation proposals, the report offers an analysis of the intra- and inter-regional variations of population and voters in the proposed constituencies. The two key variables (population and registered voters) are examined to draw inferences from:

<b>a.</b>	National average of population per NA constituency
<b>b.</b>	Provincial/Regional average of population per NA constituency
<b>c.</b>	National average of voters per NA constituency
<b>d.</b>	Provincial/Regional average of voters per NA constituency
<b>e.</b>	Application of $\pm 10\%$ variation limit on national population and voters per constituency
<b>f.</b>	Application of $\pm 10\%$ variation limit on provincial/regional populations and voters per constituency

Given the demographic complexities, there is a need to revisit the delimitation proposals and exercise to ensure equitable representation for all. For instance, a more nuanced approach guided by a variation limit not exceeding  $\pm 10\%$  from the overall average population per constituency will help ensure a more equitable distribution of population. A detailed view of the delimitation issues discussed in this report advocates the need for a significant and thorough review of the distribution and delimitation of National Assembly constituencies before their finalization. Intra- and inter-regional variations can not only have a potential impact on citizens' political representation but can also potentially lead to political tensions ahead of 2018 General Elections.

## 1. Delimitation of Constituencies: Variation in Population

The Elections Act, 2017 defines the parameter for delimitation of representation as 'elected officials from their constituencies represent the entire population'. However, the recent delimitation proposals, besides being unevenly distributed in terms of registered voters, also exhibit variations in the number of citizens to be represented in the NA (refer to Annexure-1 for average population and voters per National Assembly constituency in each district).

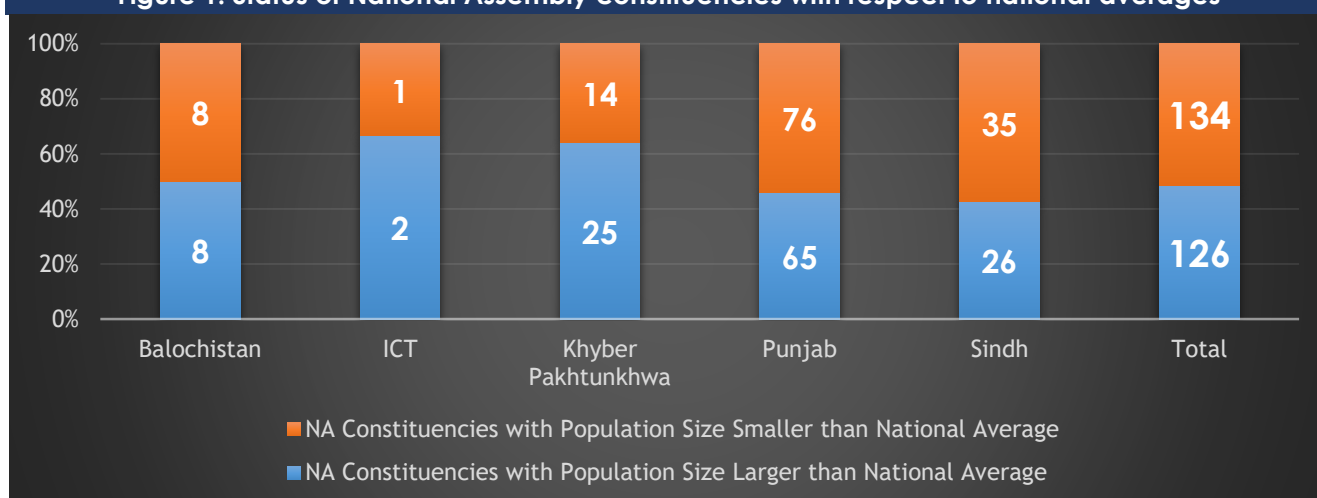

The average population per constituency in the three NA constitutions of ICT is 14% less than the national average. Among the four provinces, the average population for a NA constituency in Balochistan is lower than the national average while the average populations per NA constituency in Punjab, Sindh and Khyber Pakhtunkhwa (KP) are slightly higher (refer to Table 1).

**Table 1: Average Population/NA Constituency by Province/Region**

Region	Constituencies	Census Population	Average Population per NA Constituency
Balochistan	16	12,344,739	771,546
ICT	3	2,001,579	667,193
Khyber Pakhtunkhwa (KP)	39	30,523,371	782,651
Punjab	141	109,981,162	780,266
Sindh	61	47,893,244	785,135
Total	260	202,744,095	779,925

Plotted against the national average population per NA constituency, a total of 134 NA constituencies have smaller population sizes than the national average, while 126 have larger populations. Figure 1 illustrates the position of NA Constituencies with respect to national averages:

**Figure 1: Status of National Assembly constituencies with respect to national averages**

As shown in table 2, the population sizes of 76 NA constituencies have a deviation higher than 10 percent from the national average population per NA constituency. As many as five constituencies in Balochistan, 16 in KP, 38 in Punjab and 22 in Sindh require adjustments to fit in the legally permissible deviation range of  $\pm 10\%$ . Overall, 184 constituencies fall within the permitted range (refer to Annexure-2 for a detailed analysis of the deviations of estimated population of each NA constituency).

**Table 2: Deviation from National Average**

Region	$\pm 0\%$ to $\pm 10\%$	$\pm 11$ to $\pm 20\%$	$\pm 21$ to $\pm 30\%$	$\pm 31$ to $\pm 40\%$	$\pm 41$ to $\pm 50\%$	Total
Balochistan	11	1	1	2	1	16
ICT	3	-	-	-	-	3
Khyber Pakhtunkhwa	23	8	3	2	3	39
Punjab	103	34	3	-	1	141
Sindh	39	16	4	2	-	61
Total	179	59	11	6	5	260

#### a. Intra-Province/Region Population Variation in National Assembly Constituencies

Intra-regional disparities also exist in the population-to-seat ratios of NA constituencies, and need to be promptly addressed to ensure equal representation to Pakistani citizens. Wide variation has been noted in the smallest and largest population-to-seat ratios of NA

constituencies in all provinces. For instance, NA-37 Tank in KP represents 391,885 citizens, while a population of around 1.2 million citizens in NA-35 Bannu is represented by one NA seat. This is a serious violation of the principle of equality of vote, since the voting power of a citizen in NA-35 is effectively less than half the voting power of his/her counterpart in NA-37.

Similarly, in Punjab, NA-37 Jhelum-II has been demarcated as a constituency with a population of 546,113 citizens, while NA-87 Hafizabad-I has a population of almost 1.2 million - almost twice the population size of the former. In Sindh, NA-199 Shikarpur-II has been created with a population of 588,185 citizens, while NA-197 Kashmore represents a much larger population size of 1,089,169 citizens. In Balochistan, NA-262 Kachhi-cum-Jhal Magsi has been allocated a population of just 386,255 citizens, whereas NA-268 Mastung-cum-chaghai-cum-kalat-cum-Shaheed Sikandarabad-cum-Nushki will represent almost three-times the population of the former, i.e. 1,083,497 citizens (refer to Table 2 for intra-regional variations in the population-to-seat ratios).

**Table 2: Population-to-Seat Ratio: Smallest and Largest Constituencies by Province/Region**

Region	Smallest Constituency		Largest Constituency	
	Constituency	Population	Constituency	Population
<b>Khyber Pakhtunkhwa</b>	NA-37 Tank	391,885	NA-35 Bannu	1,167,892
<b>ICT</b>	NA-54, ICT-III	630,152	NA-52, ICT-I	700,744
<b>Punjab</b>	NA-67 Jhelum-II	546,113	NA-87 Hafizabad-I	1,156,957
<b>Sindh</b>	NA-199 Shikarpur-II	588,185	NA-197 Kashmore	1,089,169
<b>Balochistan</b>	NA-262 Kachhi-cum-Jhal Magsi	386,255	NA-268 Mastung-cum-chaghai-cum-kalat-cum-Shaheed Sikandarabad-cum-Nushki	1,083,497
<b>Total</b>	NA-262 Kachhi-cum-Jhal Magsi	386,255	NA-35 Bannu	1,167,892

Moreover, discrepancies between population figures in the proposed delimitations and provisional census data have also been noted. For instance, the total population of district Dera Ghazi Khan in the proposed delimitation is 36,303 less than the population of the district in the census data. Unless the discrepancy is reconciled, it effectively amounts to disenfranchisement of a number of citizens in the district.

## 2. Delimitation of Constituencies: Variation in Registered Voters

Section 2 assesses the proposed delimitation against the average number of registered voters per NA constituency, based on district-level voter statistics released by the ECP in 2017. The district averages of voters per NA constituency present an uneven distribution of voters in constituencies across districts in the proposed delimitation.

FAFEN has classified constituencies into the following six categories based on the number of registered voters that may fall in freshly delimited constituencies.

**Category I****National Assembly Constituencies with less than 150,000 voters:**

Unless changed in the final notification, two NA constituencies – one each in Balochistan and KP – will have less than 150,000 registered voters.

**Category II****National Assembly Constituencies with voting population of 151,000 to 249,999 voters:**

The number of constituencies with potentially 150,000 to 249,999 voters is highest in Balochistan, where the majority of NA constituencies- 10 of 16, will fall in this category. Three other constituencies falling in the category are from ICT.

**Category III****National Assembly Constituencies with voting population of 250,000 to 349,999 voters:**

More than one third of all NA constituencies - 78 to be precise - will fall in this category. Voter population in the majority of constituencies in Sindh (42 of 61) will be in this range. 20 constituencies in Punjab and 13 in KP will also fall in Category III.

**Category IV****National Assembly Constituencies with voting population of 350,000 to 449,999 voters:**

More than half of the NA constituencies (138) will have a voting population between 350,000 and 450,000 voters. The overwhelming majority of NA constituencies in Punjab (107 of 141) will fall in this median bracket.

**Category V****National Assembly Constituencies with voting population of 450,000 to 549,999:**

As many as 15 NA constituencies will fall in this outlier category. The majority of these constituencies will come from Punjab (11), along with two constituencies each from KP and Sindh.

**Category VI****National Assembly Constituencies with more than 550,000 voters:**

Four constituencies- three in Punjab and one in KP – will fall in this extraordinary category

Refer to Annexure-3 for a detailed analysis of the number of registered voters per National Assembly constituency.

**Table 3: Constituencies by Registered Voters Categories**

Number of Registered Voters	Balochistan	ICT	Khyber-Pakhtunkhwa	Punjab	Sindh	Total
Less than 150,000	1		1			2
150,000 to 249,999	10	3	3		3	19
250,000 to 349,999	3		13	20	42	78
350,000 to 449,999			17	107	14	138
450,000 to 549,999			2	11	2	15
More than 550,000			1	3		4

**Table 3: Constituencies by Registered Voters Categories**

<b>Total</b>	<b>14</b>	<b>3</b>	<b>37</b>	<b>141</b>	<b>61</b>	<b>256<sup>1</sup></b>
--------------	-----------	----------	-----------	------------	-----------	------------------------

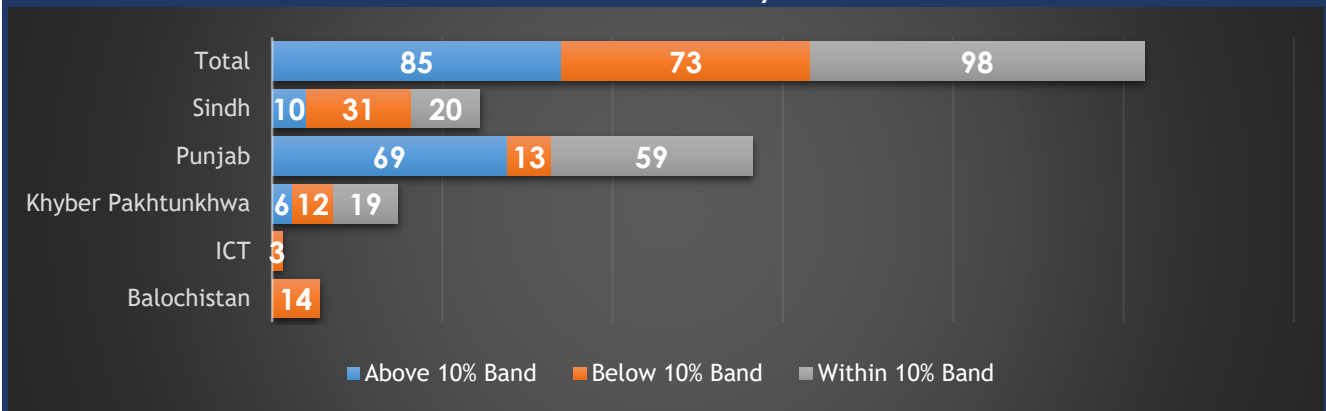

**a. Variation in Inter-Provincial/Regional Distribution of Registered Voters in NA Constituencies**

According to the ECP's voter registration data, a total of 93,316,823 voters are registered in 256 NA constituencies, yielding a national average of 364,519 voters per NA constituency. The distribution of voters across constituencies is, however, very uneven. For instance, with 138,530 registered voters, NA-262 Kachhi-cum-Jhal Magsi will have the lowest number of registered voters - 62% less than the national average. Conversely, NA-19 Haripur - the NA constituency with the largest voting population size with 617,255 voters - will represent 69% more voters than the national average.

Moreover, at the regional level, nearly three million voters in Balochistan will be represented by 16 NA seats, while four times more voters in KP - around 13 million – will be represented by 38 seats; 2.5 times more than Balochistan's seats.

Figure 6 shows the number of constituencies that deviate more than ±10% from the national average of registered voters per NA constituency. Relative to the national average, 73 constituencies will have lower averages, while 85 will have greater averages. Punjab will have the highest number of constituencies above the national average of registered voters, while 14 out of 16 constituencies in Balochistan will have fewer registered voters than the national average.

**Figure 6: Status of Constituencies by Variation of Registered Voters from National Average of Voters Per Constituency**

**b. Variation in Intra-Provincial/Regional Distribution in Registered Voters in Districts**

Electoral rolls suggest that the fresh delimitation proposals have may cause a considerably high degree of intra-regional variation among districts in number of registered voters. For instance, Haripur and Tank districts in KP have each been allocated one seat, however, the registered voters in each district amount to 604,383 and 169,305 respectively.

<sup>1</sup>Four constituencies – NA-13 Mansehra-I, NA-Mansehra-cum-Torghar and NA-258 Loralai-cum-Musa Khail-cum-Ziarat-cum-Dukki-cum-Harnai and NA-268 Mastung-cum-chaghai-cum-kalat-cum-Shaheed Sikandarabad-cum-Nushki are not included, as information of registered voters is not available.

In Punjab, there are four NA seats proposed for Gujrat District, where the number of voters exceeds 1.7 million (448,636 voters per constituency). On the other hand, Hafizabad has been allocated one NA seat for nearly 617,255 voters; significantly higher than the average in Gujrat. Other examples include Khanewal that has been allocated four seats for nearly 1.48 million voters (370,344 voters per constituency), and Sahiwal, which has been given three seats for more than 1.36 million voters (454,077 voters per constituency).

Sindh is also not an exception. Karachi South District has been allocated two constituencies where more than one million voters (504,235 voters per constituency) are registered. On the other hand, Malir District has three seats for 722,866 voters (240,995 voters per constituency); implying that every two Karachi South voters will have the same voting power as one voter in Malir.

# About **FAFEN**

- **FAFEN** is one of the most credible networks of civil society organizations working for strengthening citizens' voice and accountability in Pakistan since 2006.
- **FAFEN** has harnessed information technology for real-time monitoring, facilitation and technical backstopping of partners for effective and result-based program delivery.
- **FAFEN** is the only civil society group to have been invited by the Judicial Commission to present the evidence of illegalities and irregularities documented through the course of General Elections 2013 Observation. The systemic and procedural issues identified by FAFEN have been acknowledged by the commission in its detailed findings.
- **FAFEN's** recommendations for electoral reforms have contributed to the work of Parliamentary Committee for Electoral Reforms.
- **FAFEN's** advocacy for parliamentary transparency, accountability and reforms has shaped public discourse on parliamentary reforms. Improved citizens' access to parliamentary information including daily public release of parliamentarians' attendance records can be directly attributed to FAFEN's work.
- **FAFEN** deployed 18,000 and 40,000 non-partisan and trained observers for the systematic observation of general election 2008 and 2013, respectively, largest citizens' observation ever undertaken in Pakistan.
- **FAFEN's** evidence and recommendations for reforms have improved the quality of public and political discourse on elections, its issues and need for reforms. Leading political parties and media houses extensively use FAFEN's election findings and analysis to build a case for reforms.

With over 20,000 followers on Twitter and around 135,000 on Facebook, **FAFEN** is considered one of the most reliable sources of electoral and parliamentary information in the country.

Free and Fair Election Network (FAFEN) is a network of Pakistani civil society organizations and governed by the Trust for Democratic Education and Accountability (TDEA)

📍 Building No. 1, Street 5 (Off Jasmine Road),  
G-7/2, Islamabad-Pakistan.
